

LED Streetlight Retrofit Program: Phase 2

Planned Project Work

The City of Vaughan is advancing Phase 2 of the LED Streetlight Retrofit Program with upgrades to streetlighting in your area.

Construction is scheduled to commence in September, with anticipated completion by December 2021.

Construction Scope

Construction works include the installation of new streetlight poles on Donna Mae Crescent at the cul-de-sac. The locations of the new poles are shown on the enclosed map.

The poles will be electrically connected to each other by underground wiring buried within the stretch of the boulevard between all poles.

Upon completion of the new installations, all existing streetlight poles/lights will be removed and disposed/recycled in an environmentally safe manner in accordance with all applicable legislation and certification requirements.

The new streetlights will be of an LED light source, providing significant improvement to the street's illumination and efficiency including economic benefits.

Construction Impacts

Property owners are reminded that underground systems, such as lawn sprinklers, heated driveways, electrical conduits, or landscaping, etc., within City-owned boulevards or property limits, may be impacted by the proposed construction work.

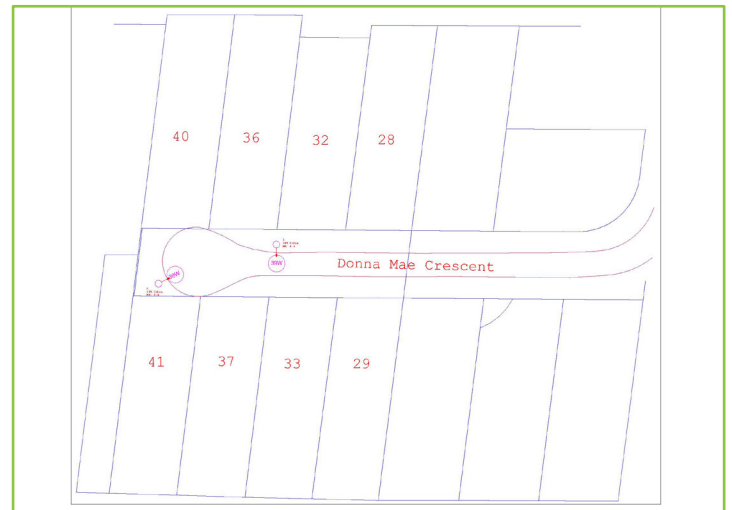

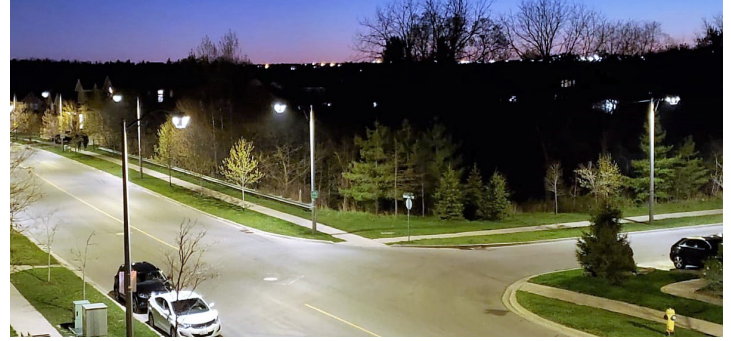

Removing privately-owned underground systems in advance of construction, at the owner's expense, is recommended. The City is not responsible for any damages that may occur during construction to privately-owned items within City property limits (Encroachment By-law No. 034-2017).

Traffic Impacts

Roads will remain open to vehicular and pedestrian traffic during construction. Temporary lane restrictions will be required to allow for construction activities to proceed in a safe and efficient manner.

Access to private driveways will not be impacted during construction.

Thank you in advance for your cooperation.

Location:

Donna Mae Crescent
at the cul-de-sac
